- Prostate problems
- Sexual dysfunction

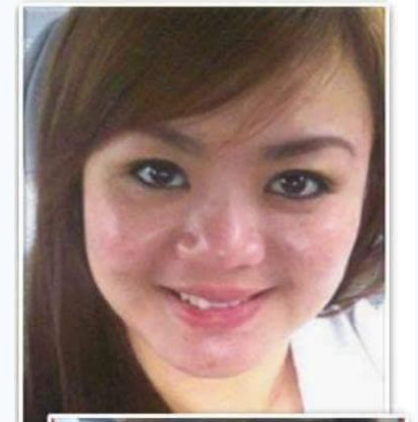

* "Uterine erosion" follows the wording used in the Chinese source.

Testimonial 1

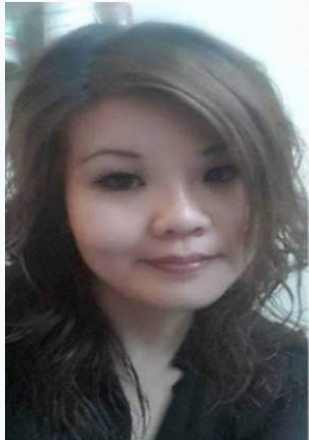

CUSTOMER TESTIMONIAL

“After using MK10, I passed blood clots from my uterus, and my complexion looked better. I no longer experienced abdominal pain!”

Testimonial 2

CUSTOMER TESTIMONIAL

“After using the intimate revitalising spray, hard lumps and fluid-filled cysts in my uterus were gradually expelled. Thank you, MK10, for helping me avoid surgery!”

Testimonial 3 - Stretch marks

CUSTOMER TESTIMONIAL

“After using MK10 for 7 days, my pregnancy stretch marks were greatly reduced!”

Testimonial 4 - Menstrual blood colour

CUSTOMER TESTIMONIAL

“Since using MK10, the colour of my menstrual blood has changed from murky to bright red!”

MESSAGES SHOWN IN THE SOURCE CHAT

“If you mind, I won’t upload the photos.
Okay, then.
The photo below is one I just took today.
I’m so excited!”

From murky to bright red

Testimonial 5 - Menstrual pain

CUSTOMER TESTIMONIAL

“Since using MK10, my menstrual blood has become bright red. The severe abdominal pain I used to have during my period has completely disappeared!”

MESSAGES SHOWN IN THE SOURCE CHAT

“Look at what came out after I used the intimate spray. It looks like flesh or skin - really gross. The intimate spray works so well. It has helped me a lot since I have just had a baby.

Thank you for introducing such a good product to me.

My stomach used to hurt terribly during my period. Now, after using the intimate spray, my periods are not painful at all. I don't even feel them.

Reply: Oh my goodness...”

Vaginal discharge and itching

Fong Shirley

“This is one of my daughter’s favourites. After using it, she hardly has any of that whitish discharge, and I rarely hear her say she feels itchy anymore. I tell her to use it diligently every day. She really likes it.”

S Ching Lee

“I use MK10 diligently, even when I go to the toilet in the middle of the night. My intimate area feels fresh and dry, and tighter too. It feels different. Thank you, Teacher Yang and Fuzhou Mei, for making my intimate area happy.”

Delphine Ang

“MK10 really is worth using. There is less vaginal discharge and no more itching. Ha ha! Both men’s and women’s intimate areas will be happier. My husband also uses it on his scalp. MK10 works particularly well for inflammation and is good at relieving itching.”

ShokYi Loh

“MK10 is also one of my favourites. After menopause, I had problems with my intimate area: it was constantly dry and itchy, and sometimes inflamed. I had to see a doctor and insert medication. I have used MK10 since it was first launched, for more than two years now. Since then, I have had no itching, dryness or inflammation, and the area feels moisturised. A gynaecological check-up also found that my uterine fibroid had become smaller. It can also fade stretch marks. I now spray MK10 on my surgical scar, and it is less itchy. I am very grateful.”

Intimate odour

Alicia Chong KY

“I have benefited from MK10. My intimate area looked dark, my menstrual cycle was irregular - sometimes every few weeks and sometimes almost once every two months - and I had itching and odour.

I saw a doctor, who said there was an infection. The vaginal medication improved the infection slightly, but the itching and odour did not fully go away.

After using MK10, the pigmentation in my intimate area decreased, and the itching and odour were resolved. My menstrual cycle also returned to normal. Thank you to the MK research and development team for helping people troubled by these issues.”

Urethritis and vaginitis

Lee Hui Kian

“My younger daughter had a lot of vaginal discharge and was prone to urethral inflammation. She saw a doctor and took medication, but there was no improvement. After spraying MK10, it really improved.”

Jess Lim

“I have used MK10 for two months. I go to the toilet less often, and my urethritis has completely healed. I really like MK10.”

Wong Siew Siew

“I use MK10. I had problems with urinary tract infections. Previously, I would get an infection and need to see a doctor about once every two months. Since I started using MK8 in March last year, things have improved a lot. I have not had an infection in the past six months. Thank you. I am grateful.”

Translator's note: This comment mentions both MK10 and MK8 in the original.

Menstruation and menstrual pain

Fendy Ch'ng

"I used to have menstrual pain all the time. Recently, since using MK10, the pain and itching have been less severe. I'm not sure whether it is because of MK10."

Sook Wei Lee

"My periods had been irregular for a while. I could go two or three months without one, and when it came, the flow was very light. After using MK10 for a few days, my period came with a heavier flow. I immediately felt that I was back to normal."

Lim Wendy

"MK10 is my favourite product. It helped after I had gone nine months without a period. I noticed a result after one bottle. Now my period comes every month, and my intimate area is well lubricated - so much more pleasure!"

Sook Wei Lee

"Speaking of MK10, I have to share again. MK10 came to my rescue. More than six months ago, my periods were terribly irregular, and it was driving me crazy. Sometimes they came, sometimes they didn't, and when they did, there was only a little bleeding. Since using MK10, my periods have been so regular that I can hardly believe it - for three or four months now. The flow is heavier too. That's what feels normal. Before this, I was frightened that I might be reaching menopause at such a young age!"

Ivy Lim Ivy

"This works well. I passed a lot of blood clots during my period."

Uterine cysts and fibroids

Ivy Ai Lee Lee

“Before using MK10, a check-up found a cyst. Six months later, I went for another check-up, and the doctor said my uterus and ovaries were healthy and looked good. Thank you, Teacher Yang and Fuzhou Mei, for sharing and helping everyone so much.”

Shiueh Lian Wong

“I used MK10. My abdomen used to feel hard to the touch because of a 10 cm uterine fibroid. After one and a half bottles, it felt soft. During my period, I passed fewer hard clots, and my abdomen no longer hurt. I also sprayed the area around my belly button until it was moist.”

Xinyee Low

“I bought it because I had a uterine fibroid. When I went for another check-up a few months later, it had become much smaller. I was very happy. It is a very good product.”

Stephanie Chin

“MK10 can also help mothers who have just given birth. My daughter-in-law started using it after having her baby and has kept using it. Her uterus recovered quickly, and she felt much more comfortable.”

Sexual well-being

Mavis Tan

“I had my husband use the MK10 from the mystery box. I don’t know whether it was a coincidence or an effect of MK10, but for those few days he wanted extra “bedroom overtime”, and I ended up exhausted!”

Vanesha Law

“After giving birth, I was very dry and lost interest in sex. Using MK10 really brought my husband and me closer together.”

“Bedroom overtime” conveys the playful euphemism used in the original comment.

SHARED EXPERIENCE

After using MK10 intimate revitalising spray for two weeks, I regained the feeling of morning erections I had in my younger days. My vitality is back!

Sexual well-being

Helen Tham

“The looseness and dryness really have been resolved. It is a great product.”

S Ching Lee

“After using MK10, both his and her intimate parts are happy - hers feels 18 and his feels 19! Ha ha!”

Redness and swelling

Wai Man Pun

“MK10 - I spray it on my dad every time I change his diaper. After about a week, there was a clearly visible change. There is redness and swelling...”

Translator's note: The source ends with “there is redness and swelling”; the final phrase appears incomplete.

Pimples in the intimate area

ChinMor Loh

“I used to get large pimples in my pubic area quite often. Since using MK10, I haven’t had any for several months.”

Fong Shirley

“Also, after using MK10, the large lump in my intimate area disappeared. There is no more pain or swelling. I’m sharing my honest experience.”

Tony's experience - A foot wound

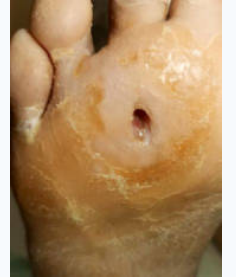

Tony

"MK10 has helped the wound on the sole of my foot noticeably.

Because I have diabetes, a bacterial infection in a wound on my sole led to surgery. Afterwards, I spent more than a year going to hospital regularly to have the wound cleaned and following a strict diet. That was how I avoided the risk of amputation.

The wound eventually healed completely, but I still had to have the surface treated every two weeks. Dead skin would build up easily and cause problems or infection beneath the old wound. I therefore tried to avoid putting too much pressure on my right foot. Too much pressure made the dead skin build up faster, and the problems kept recurring.

A few months ago, I started spraying MK10 on the surface of the old wound. For about a month now, very little dead skin has grown there. I have gone more than a month without needing treatment for the wound or having an infection. I am happy!"

Before-and-after photos and shared feedback

CUSTOMER MESSAGE

"I sprayed very generously and used up three or four bottles of MK10, but the effect on the inflammation was really good. Remember to ask Teacher Winston to give me a gift. Ha ha!"

REPLIES

"Ha ha ha!
I'll take a screenshot and show him."
