

Myopia

Student Wang

| Student Wang

Concern: Myopia.

Reported improvement: Before using MK20 Eye Care Water, visual acuity was 0.4. After a period of use, it returned to 1.0. The student reports no longer needing glasses.

Li Yuyu

| Student Li Yuyu

Concern: Myopia of more than 3.00 dioptres.
Reported improvement: After wearing glasses for four years, Li Yuyu used MK20 Eye Care Water for six months under her mother's supervision and reports that she stopped wearing glasses.

Customer statements are translated as personal accounts. Prescription figures are converted from the source's "degrees" to dioptres (100 degrees = 1.00 D); visual acuity values are unchanged.

Myopia

Li Yanqiu

Li Yanqiu

Concern: Myopia.

Reported improvement: This young girl had worn glasses for three years. After using MK20 Eye Care Water for one month, she reports no longer needing them. The original caption adds that she looks even prettier without glasses.

Li Jiazheng: with and without glasses

Li Jiazheng, age 17

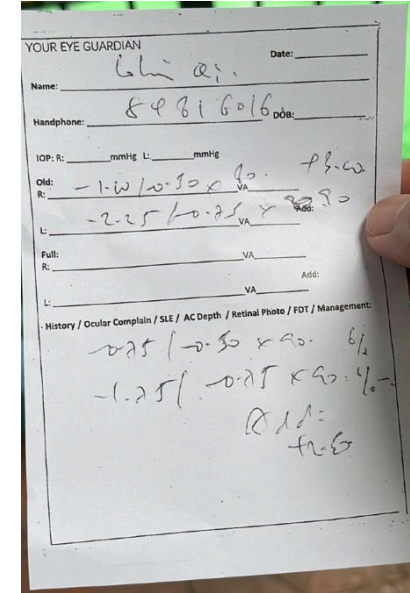

Concern: Myopia of about 6.00 dioptres (described as more than 6.00 in the accompanying text).

Reported improvement: After three months of MK20 Eye Care Water under his mother's supervision, he reports that his vision recovered and he stopped wearing glasses.

Original examination record

Reported prescription changes

Right eye: 1.00 to 0.75 dioptres.

Left eye: 2.25 to 1.75 dioptres.

Acquired Blindness

Before MK20

After five years of use

Background and reported progress

At about four or five years old, he fell and hit the back of his head. As he grew older, he developed light sensitivity and difficulty focusing. By adolescence, he could no longer see objects clearly and could perceive only blurred shapes, faint light and black-and-white images. Now aged 26, he has used MK20 Eye Care Water for five years, spraying at least 20 times a day. He reports that his vision gradually became brighter, that he can go out to work, distinguish directions and see outlines, and that he can now perceive colour.

His experience

Before using MK20, his eyes often felt very dry and he had to strain to focus. He gradually developed a squint. By adolescence, he needed a cane and was living with a disability. His eye condition created repeated obstacles in education and employment. His confidence fell, and he often avoided going out to reduce the burden on his family.

When he first used MK20, his eyes became very itchy and watery, with substantial eye discharge, mucus and white fluid. He sprayed at least 20 times daily. After about three months, his eyes were less dry. Around the ninth or tenth month, he suddenly found a lamp's light dazzling. He felt delighted, thinking this meant he could see again.

Myopia

Justina Tong

I bought a trial pack from Eshoplive two months ago. After two months of use, my 13-year-old son's myopia changed from 2.50 to 2.00 dioptries. Even the optometrist thought it was remarkable. Thank you, teacher!

Judy Lin

When I took off my glasses, I could not see a person's whole face clearly. After using fewer than two bottles, my eyes really felt much brighter.

Jenny Koo

I had 6.00 dioptries of myopia and 3.00 dioptries of astigmatism. Driving at night was especially difficult. After using MK20, I noticed blurred vision one day and visited an optical shop. It turned out that my myopia had dropped from 6.00 to 5.00 dioptries and my astigmatism to 2.00 dioptries. Now I can drive at night without asking my husband to take me. I have used it for only six months and am very happy with the result.

Sook Wei Lee

MK20 is a really excellent product. My seven-year-old daughter keeps asking me to spray it for her because she does not want to wear glasses anymore. Her myopia is 6.00 dioptries. I am looking forward to her next eye test. Lately, she has stopped reaching for her glasses as soon as she wakes up, which she always used to do. Perhaps her vision is not as blurry now.

Presbyopia

| Source explanation

Presbyopia is mainly a natural physiological change associated with ageing and usually appears around age 40. The lens inside the eye gradually hardens and loses elasticity, while the ciliary muscles' ability to contract and adjust focus declines. This makes it difficult for the eye to focus light from nearby objects onto the retina.

Presbyopia

Presbyopia

Phuah Siew

Phuah Siew, age 53

Klang, Selangor, Malaysia.
Concern: Presbyopia.

Initial reaction, described as "detoxification"

When I first started spraying MK20 Eye Care Water, my eyes kept watering, and something like "black grains of sand" came out. This lasted about two or three days. At the time, I worried that something might be going wrong with my eyes.

Reported improvement

After continuing for one week, I noticed a little improvement. Over the next few days, my eyes began to feel brighter and I could see more clearly. I am very happy now because sometimes I can see clearly without my reading glasses.

Presbyopia

| Li Dian

MK20 has improved my presbyopia. I changed from 3.50-dioptre reading glasses to 2.50. Thank you, MK20!

| Li Dian - follow-up

The eye test confirmed it: I can only wear 2.50-dioptre reading glasses now; stronger ones make me dizzy. MK20 saved me! Friends also report improvements and everyone is happy. I hope that continuing will eventually let me put away my reading glasses.

| Huixuan Lee

My presbyopia has improved a lot since using MK20. Thank you, MK20, for helping my eyes. They no longer feel dry. It is really excellent!

| Leang Jessica

I have presbyopia and it has improved a lot with MK20. Thank you, MK20.

Vision with Astigmatism

Source explanation

The cornea has an irregular curvature: rather than being a perfectly round hemisphere, it is more oval. Put simply, when the vertical and horizontal curvatures of an eye differ, the difference in refractive power is called astigmatism. The source describes heredity as the main cause and also mentions environmental factors such as reading habits and insufficient lighting.

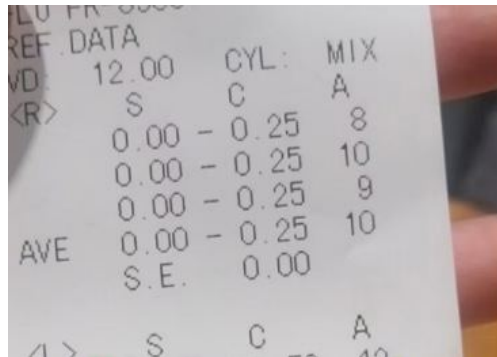

Illustration of vision with astigmatism

Astigmatism

Customer photograph

Original eye-test printout

Photo caption

"Astigmatism of 2.00 dioptres and myopia of 1.00 dioptre. My vision has now fully returned to normal."

Reported experience

"The astigmatism is gone, and driving is no longer difficult."

Vision with Eye Floaters

Source explanation

Eye floaters are formally described as vitreous opacities or floating material in the vitreous. With ageing, part of the vitreous liquefies and separates from the inner surface of the eye. Light entering the eye casts shadows of this cloudy material onto the retina, creating the impression of objects floating in the field of vision.

Illustration of vision with floaters

Eye Floaters

Customer message to the SSKO community

Hello, SSKO family! A little update: I have just finished one bottle of MK20 Eye Care Water. One day, more than a year ago, black circles and lines suddenly appeared in my vision and moved with my eyes. I was frightened and wondered what was happening. They became more numerous over time. Someone told me these were probably floaters.

After one bottle, the circles and lines in my left eye have disappeared; only a few small circles remain in the right. Amazing! Thank you, SSKO, for bringing us this product. Love you all! I am also taking sacha inchi oil and will share about that another day.

Yuan Fen Yeoh

My eyesight was poor, with floaters and presbyopia. I saw a doctor who said laser treatment would cost several thousand. I ordered MK then, and after two weeks my floaters improved and my presbyopia also reduced. I could hardly believe it myself. This is a real experience.

Apek Ching KM

I have severe myopia of more than 10.00 dioptres in each eye, excluding astigmatism. I initially bought the A+6 three-month package just for the refreshing feeling. But I noticed improvements: my eyes did not get dry or tired so quickly, and the "little UFOs" stopped floating around. That was how I knew it was working.

It feels better each time. My routine is two close-range sprays per eye and one spray from six inches away, to care for the inside and outside. I especially enjoy it chilled from the refrigerator.

Eye Floaters

Winnie Tham

Before MK20, I had presbyopia and floaters. When Winston introduced it on SHL, I watched for several months before buying. After three months of use, my presbyopia and floaters really improved. I am very grateful to Winston and SHL for this product and its promotional price.

Annie Liew

I spray once every half an hour. My floaters have improved greatly; now only one tiny black dot remains.

Mdm Choo

When I first used MK20, I had many floaters. I saw a Facebook broadcast saying it could help, so I ordered and used it as soon as it arrived. After three days, the floaters had reduced a lot. I kept spraying diligently because I had gained confidence.

Joyce Leung

My daughter says her floaters improved after using MK20 and the black dots have faded.

Cheah Siew Chan

My floaters have also improved with MK20. I used to need my child's help to thread a needle. Now I can do it myself, and my eyes feel especially bright.

Comparing Three Eye Conditions

Normal vision / Glaucoma

Normal vision / Cataract

Normal vision / Macular disease

Glaucoma

Image comparison: Normal vision / Glaucoma.

Main symptoms: Narrowing of the visual field, headache and pressure or swelling sensations in the eyes; severe cases can cause blindness.

Typical groups: Older adults, people with high eye pressure and those with a family history.

Reversible? No. Optic nerve damage is irreversible.

Cataract

Image comparison: Normal vision / Cataract.

Main symptoms: Blurred vision, sensitivity to light, glare at night and faded colours.

Typical groups: Older adults, people with diabetes and those with long-term sun exposure.

Reversible? Yes, through surgery to replace the lens with an artificial one.

Macular disease

Image comparison: Normal vision / Macular disease.

Main symptoms: Distorted vision, blurred central vision and difficulty reading.

Typical group: Older adults (also known as age-related macular degeneration).

Reversible? No, but early treatment can slow progression.

Source attribution in the original: ophthalmologist Dr. Linda Ong Sui Lin.

Macular Disease

Janet's interview

| Janet, Hong Kong

"I had macular disease in my eye. After spraying MK20 Eye Care Water for almost two months, my vision became clearer. Even the doctor said, 'Janet, where have you been? Why does your eye look so much better?'"

| Video text

"I have macular disease in my eye."
Promotional inset: "MK20 Eye Care Water - restoring natural health function."

Vision with Cataract

Source explanation

Cataract is a common eye condition in which clouding of the lens causes declining vision. In older adults, cataracts are mostly age-related and are mainly attributed in the source to age-related changes in lens metabolism. Vision loss due to cataracts is painless and gradual, particularly in older people with myopia or hyperopia.

Illustration of blurred vision with cataract

Cataract

Kit Ching Wong

I have already had cataract surgery, but sometimes I still experienced glare and haziness. Since using the eye care water, I can see much more clearly and my eyes no longer have that dry, gritty feeling.

Quai Jin Fong

MK20 is a very good product. After cataract surgery, using it stopped my eyes from feeling dry and gritty.

Tay Lily

I had cataracts before. After four months of use, the doctor said my cataracts were gone. My husband's presbyopia also reduced a lot. It is a very good product.

Ashley Ang

MK20 is a lifesaver for my eyes. My mother has cataracts and very sensitive eyes. For two days she kept saying her eyes were uncomfortable, but her ophthalmologist had retired and we needed to find another doctor. With no other option at the time, I gave her MK20. After finishing one bottle in two days, she said her eyes were no longer uncomfortable and she was no longer afraid of sunlight. Thank you, teacher!

Cataract

Wong Khin Ling

I started spraying MK20 when it was first broadcast on SHL. Last year, my ophthalmologist said my dry eye was gone. A few weeks ago, at my annual eye appointment, the doctor again said the dry eye was gone, the cataract had not worsened, and my eye pressure was 11. The doctor said this was very good for my age. Thank you, MK20, Winston and SHL!

Sook Chan

After my mother used MK20 for a while, she went back for a check-up. The doctor said she no longer needed cataract surgery. Thank you, MK20.

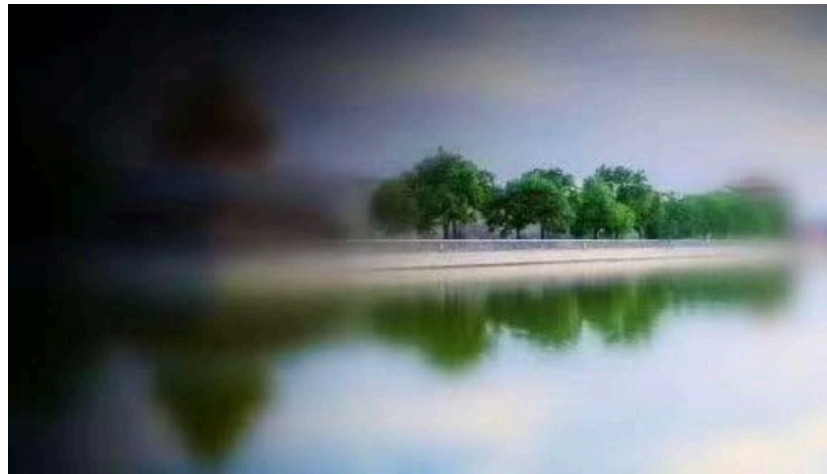

Annabelle Leng

My mother had a cataract in one eye, could not see and was due for surgery. After using MK20, she experienced what I describe as "detoxification": her eye was red and very tired. I helped her apply an eye mask, and gradually the redness and tiredness eased. Her vision has now recovered a little and she can see things. She uses MK20 diligently every day.

Vision with Glaucoma

Source explanation

Glaucoma is a group of eye diseases characterised by optic nerve damage and visual field loss. The original text identifies abnormalities in eye development and poor emotional state in older adults as triggers, and also states that excessive eye use, such as reading newspapers for long periods, can trigger glaucoma.

Original visual illustration

Glaucoma

| WhatsApp message to Winston Yoo

Teacher Winston, I have good news. My uncle had glaucoma and eye pressure readings of 24/26. He was due for surgery. I ordered MK20 for him, and after one month of spraying, the readings were 16/18. He no longer needed surgery. Thank you for introducing such a wonderful product!

| Cynthia Cheang

My mother has had glaucoma for over 20 years. Her eye pressure was usually in the twenties. After using MK20, a recent doctor's visit showed it had fallen to 16. Our family is very happy.

| Marcos Foo

My wife works in an office and spends long hours at a computer. Her eye pressure was high and uncomfortable; sometimes her vision went black, which frightened her. I bought MK20 and asked her to keep spraying it. After using it consistently for a while, her eyes felt much better. The blackouts stopped and she could see more clearly.

Original caption: Normal eye pressure is approximately 10-20 mmHg.

Glaucoma

Kelly Lai

For a while my eye pressure was very high. I spent all day on the computer and phone and overused my eyes. They were very uncomfortable, but after spraying MK, the pain quickly stopped and my eyes felt much better.

Ayumi Ling

My mother has presbyopia and glaucoma. After spraying, the levels really came down and we saw results in just three months. She finds the eye care water amazing. Thank you, teacher Vincent!

Lim Suet Jin

I have mild glaucoma, with painful, watery eyes. After using a small bottle of MK20, things improved a lot. Thank you, teacher Yang, for sincerely recommending it. I bought it and it suits me.

Lee Hui Kian

My neighbour's child studies at a university in KL. Possibly from using a computer every day, his eyes felt dry, itchy and uncomfortable. An ophthalmologist gave him eye drops, which he used daily. Some time later, he was diagnosed with glaucoma, which troubled him.

When I heard about it, I gave him one bottle of MK20, hoping it would help. After finishing it, he felt it worked well and asked me to order a small package. He continued for more than three months. At his follow-up, he had really improved. The doctor was surprised and asked what he had taken. He said he sprayed MK20 daily. His whole family thanked me for introducing it. Thank you, Dr Chan, for developing this product to benefit people!

Retinal Disease

| Cristal Lee

I have bought MK13, MK10, MK20 and other products. MK20 has been very helpful for my eyes. I have retinal disease and need follow-up appointments with an ophthalmologist, who gives me eye drops. Since using MK20, I no longer buy the eye drops from the clinic. Whenever my eyes feel dry, I spray MK20. I always keep it in my handbag. Recommended!

| Sok Meng Chew

A few years ago, I had a hole in the retina of my left eye and received laser treatment. Since the SHL presenter introduced MK20, I have used it continuously. My floaters and the astigmatism that affected night driving have improved; my eyes feel brighter and my presbyopia is better too. At my annual eye examination, the ophthalmologist says my eyes are very good and there is no membrane. Thank you for such a good product.

Corneal Detachment and Dry Eyes

Mavis Tan

I must share this. I had surgery for corneal detachment. My eyes were persistently dry and extremely itchy, and I relied on eye wash for a long time. Then I used MK20 and kept spraying as instructed. My eyes stopped itching and feeling dry, and I no longer used eye wash. I find it safe and economical. If you have similar problems, I strongly recommend trying MK. You may be like me and want to tell everyone. Thank you for introducing MK to people with eye problems.

Mavis Tan - verse

Once my eyes sparkled with enough power to charge an iPhone, Bright and expressive, outshining eight hundred filters; One glance made passers-by stumble three and a half steps.
Then an accident arrived without warning, And my cornea left without a backward glance. From high definition to standard definition, from delicate beauty to damage.
My eyes were drier than a desert thirsting for water, Itching and red veins checked in almost every day. Rubbing my eyes became my daily lesson, Dryness, itching and redness staged an endless palace drama.
Then came MK20, like the legendary physician Hua Tuo reborn: Quantum molecular technology, The essence of selenium, zinc, magnesium and copper, Thoughtful craftsmanship in every drop of science.
Though MK20 is water, it can knock out eye drops; A gentle spray cares for the depths of the eyes, This eye-saving water has won a place in my heart.

Itching, Sensitivity, Redness and Swelling

| Source explanation

Common causes include allergic conjunctivitis (pollen, dust mites and pet hair), bacterial or viral infection (styes and conjunctivitis), dry eye and environmental irritation (dirty contact lenses or chemicals). The source describes histamine release from an overactive immune response as a major cause of itching and swelling.

Eye discomfort

Redness

Swelling

Itching, Sensitivity, Redness and Swelling

MK20 product photograph

Photo testimonial

My eye was red and inflamed. After spraying for one day, it was better!

I often rub my eyes and stay up late, so my eyes become inflamed easily. Usually it takes at least three or four days to recover, and I need to see a doctor and use anti-inflammatory eye drops. This eye care water has natural ingredients. I sprayed it for one day and was better the next day. If, like me, you often have inflammation, dry eyes, floaters or other eye discomfort, the original testimonial recommends long-term use.

Photo labels: "After one day of spraying" / "Red and inflamed" / "Better!"

Jean Ling

Previously, my eyes were very sensitive to fragrance and would keep watering. Now I can have fragranced products at home without itchy eyes. Since using MK20, I no longer rely on eye drops.

Itching, Sensitivity, Redness and Swelling

Initial symptoms

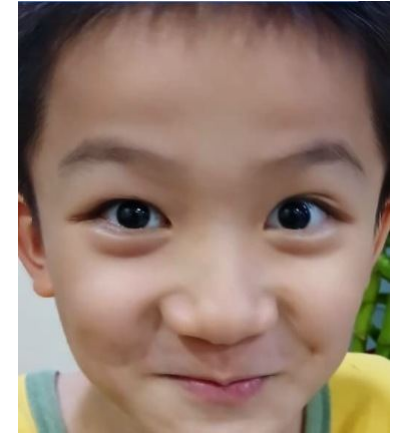

Discharge

After one day

Visible sty

After three days

A parent's photo sequence

1. Itching, dryness, continuous tearing, pain and swelling.
2. During the afternoon nap, I noticed thick discharge and interpreted it as "detoxification".
3. I sprayed frequently with MK20 from the refrigerator. The swelling went down a lot in one day.
4. We realised it was a sty when a distinct bump finally appeared.
5. After just three days, the child had recovered and was smiling happily.

Itching, Sensitivity, Redness and Swelling

Cheng Lay Kien

My eyes used to be red, swollen and itchy. I was lucky to discover MK20. Now even looking at my phone for a long time does not tire my eyes. I spray it every day.

Annie Liew

Very useful. My eyes were tired and bloodshot. I sprayed regularly and they improved. Really excellent!

Zi Xin

I highly recommend MK20. My eyes itch easily. After a few sprays they were much better and did not become itchy so easily.

Ah Kit

My mother had a sty. After spraying for three or four days, it became smaller and eventually disappeared.

Helen Lee

Last Thursday my right eye suddenly became red and swollen, like conjunctivitis, and hurt when pressed. Luckily the product arrived that afternoon. I opened it and kept spraying. When I checked yesterday, it had improved within four days and was no longer red or swollen. I am grateful.

Kent Lee

Sometimes my eyes are sensitive. Spraying this feels warm and very comfortable.

Itching, Sensitivity, Redness and Swelling

Chen Meilan

Teacher, MK20 is really useful. My friend's eyes were red and painful, and he planned to see a doctor. I gave him MK20 to use, and afterwards his eyes were neither red nor painful.

Lim Saw Teng

My grandson has sensitive eyes and keeps rubbing them until they become red and swollen. After using MK20, they were no longer red or swollen.

Peng Jinying

My daughter wears contact lenses every day. One day her eyes became inflamed, red and swollen. After spraying the amazing MK20, the redness and swelling subsided immediately. Previously she had to see a doctor every time.

Christina Lim

I spray 20 times a day.

Christina Lim - further comment

I have used two MK20 packages. The itching has improved a little. I have had myopia, astigmatism and presbyopia for 20 or 30 years, so I think recovery needs time. I also apply an eye mask every night. A small hard patch on my face has now softened.

Itching, Sensitivity, Redness and Swelling

| Jean Ling

Previously, my eyes were very sensitive to fragrance and would keep watering. Now I can have fragranced products at home without itchy eyes. Since using MK20, I no longer rely on eye drops.

| Grabber KL

A surprising product. I bought a trial pack and was doubtful at first. My eyes were very itchy and a little red, and felt uncomfortable if I did not spray. After a while, I really felt it was working.

| Mee Har

Two days ago, both my eyes were red and had sticky discharge. After spraying continuously for one day, the redness and sticky discharge were gone.

| Delphine Ang

I do not have myopia or presbyopia and have no particular eye problems, but I still spray MK20 morning and evening for care. When my eyes were red and swollen, I sprayed very diligently throughout the day and saw an immediate effect. It is a travel essential for me.

Infection, Redness and Swelling

| Idy Wong

On the ninth day of Chinese New Year, my eyes were red and swollen and no doctor was available. After spraying MK20 for a few days, they were better. Luckily I had MK20.

| Jenny Bong

MK20 is good. Last week I woke up with a suddenly red and swollen left eye. It frightened me and I wondered whether it was conjunctivitis. I remembered MK20 and kept spraying, without counting how many times. By the afternoon, my eye was much better and less red and swollen. By evening, it had completely subsided.

| Clarins Lee

My eyes became infected while I was cleaning dust and powder. They were unusually red and swollen, with pus and many red blood vessels. I kept spraying MK20 and recovered after two days. Now I carry MK products with me. Excellent!

| Linda Low

Sunday Banana Brother, a few days ago, just before bed, I noticed a large red patch in my eye and was startled. Luckily I had bought MK20 to keep at home. I quickly sprayed it, got up to spray during the night and continued frequently in the morning. After three days, it was completely better. MK20 is amazing. Anyone who has not bought it should order it!

Personal account

"I woke up in the morning with an uncomfortable eye and saw that a blood vessel had burst. I then used MK20. After three days, it was gradually fading. To be safe, I saw an ophthalmologist, who said the eyeball was not injured and everything was fine. MK20 is really great!"

Eye Pain and Fatigue

Shirley Cheng

Two days ago, the corner of my eye was very painful. I sprayed MK20 a few times and did not even need to see a doctor.

Chan Cherry

After using MK20, I can see more clearly and my eyes do not tire so easily during long hours at the computer. It is a great companion at work.

Christina Lim

I have used MK20 for many years. It has improved the tearing and stinging in my eyes. I spray every day, around 20 times a day. Seeing things takes less effort now. Thank you for the recommendation.

Hui Fen Yang

I did not expect MK20 to do more than reduce tiredness. The surprise was that spraying several times in a day made my eyes look bright and moist.

Jing Herng Wong

After using MK20, my eyes are less dry and the tiredness has reduced a little.

The first comment contains an apparent typo about pain; the clear statements about a few sprays and not seeing a doctor are retained.

Eye Pain and Fatigue

| Tan Elaine

My eyes felt a little painful and prickly that day. I remembered buying MK20 and tried it, although I was doubtful. After "15", I really felt much better. MK20 is great! [The original does not state the time unit.]

| Mdm Choo

This morning my eyes were stinging, and rubbing made them hurt more. I remembered MK20 and sprayed twice; the pain stopped. You have to use it yourself to appreciate its benefits.

| Jack Tay

I spend a lot of time at a computer and work from home. My myopia had worsened and my eyes were tired and red. I saw a HOYIYO Facebook livestream about MK20 and decided to try it. It really had an effect: my myopia reduced, my eyes felt comfortable after spraying, and they were no longer red.

| Janet Jong

I use MK20 every night before bed. It relieves eye fatigue and has improved my dry eyes. The new-generation spray nozzle works much better than the previous one.

Eye Pain and Fatigue

| Sau Mui Yap

My daughter uses a computer often. Last month her eyes were red, painful and dry, so I told her to keep spraying MK20. She did not believe in it at first, but after her eyes improved she stopped teasing me that "everything Fuzhou Mei sells is good"!

| Wong CL

My boyfriend injured his eye at work half a month ago. The doctor gave him one week of medical leave to rest his eye, saying that the pupil had been injured and flashes of light could increase. I made sure he used it at least 20 times a day. Now the pain has stopped and no flashes have appeared. Thank you, MK20.

Dry Eye

| Source explanation

Dry eye mainly results from insufficient tear production, poor tear quality that causes excessive evaporation, or uneven tear-film distribution. The source lists meibomian gland dysfunction (MGD, stated as accounting for over 50%), ageing, prolonged screen use with less blinking, dry environments such as air-conditioned rooms, contact lens wear, autoimmune disease and medication side effects among the main causes.

Screen-related eye discomfort

Eye-drop illustration

Contact Lens Experiences

Fanny Fanny

I could not remove my contact lenses. I sprayed MK20 immediately and then they came out easily. My eyes were neither red nor swollen.

Sook Wei Lee

If you wear contact lenses, I especially recommend spraying MK20. The eyes feel very comfortable and do not feel dry.

Alicia Chong KY

I wear contact lenses. Before using MK20, wearing them for more than three hours made my eyes dry, tired and bloodshot. Since using MK20, my eyes still feel moist after eight hours at work; they are no longer dry or bloodshot. Thank you, MK20.

Ee Bebe

MK20 helped improve the dry eyes caused by my contact lenses. My eyes used to be so dry that they hurt, and even eye drops did not relieve them. After discovering teacher Yang's MK20, the dryness improved a lot. Thank you, MK20.

Dry Eye

Lye Lee Chien

Yes, MK20 is very good. My eyes often felt dry and tired. After one small bottle, they improved a lot.

Jestina Ooi

Before MK20, my eyes felt dry and as if there was a grain of sand in them. After finishing one small bottle, the problem was gone. I am continuing to use it.

Toh Robert

After my mother used it for two months, her eyes stopped feeling dry. Now she sprays it as needed for maintenance.

Morls Chla

After a few sprays of MK20, the dryness and itching have already started to improve. Thank you, teacher.

Sook Wei Lee

Since drinking N91, my bowel movements have been very smooth, two or three times a day, and I feel my tummy is smaller. MK20 is also very useful. I wear contact lenses and always keep a bottle on my desk. Whenever my eyes feel dry, I spray it and feel comfortable. My daughter also keeps asking me to spray it for her because she does not want to wear glasses anymore.

Dry Eye

Peiying PY

My mother's eyes become dry easily and itch whenever they are sensitive. She used to need allergy medicine to stop the itching. Since spraying MK20, she has improved a lot.

Wong Khin Ling

MK20 has improved my dry eye. My eyes are less dry, some sticky fluid has come out, and my floaters have faded too.

Foo Yee Lee

I am on my second bottle. It is good; my eyes have improved and are not so dry now.

Ivy Lim Ivy

MK20 is good. It has helped my dry eye a lot.

Ivin Tan

I have used three bottles of MK20. At first, my eyes produced a lot of discharge. Now they do not get so dry and feel more comfortable.

Xia Qian

It has been a year since I had laser treatment, and my eyes were very dry. After a little over one month of use, the dryness was resolved.

Dry Eye

Lye Lee Chien

Yes, MK20 is very good. My eyes often felt dry and tired. After one small bottle, they improved a lot.

Jestina Ooi

Before MK20, my eyes felt dry and as if there was a grain of sand in them. After finishing one small bottle, the problem was gone. I am continuing to use it.

Toh Robert

After my mother used it for two months, her eyes stopped feeling dry. Now she sprays it as needed for maintenance.

Morls Chla

After a few sprays of MK20, the dryness and itching have already started to improve. Thank you, teacher.

Since drinking N91, my bowel movements have been very smooth, two or three times a day, and I feel my tummy is smaller. MK20 is also very useful. I wear contact lenses and always keep a bottle on my desk. Whenever my eyes feel dry, I spray it and feel comfortable. My daughter also keeps asking me to spray it for her because she does not want to wear glasses anymore.

Dry Eye

| Hoang Lam

It has helped my dry eye.

| Peng Jinying

Previously, whenever I looked at my phone or watched TV for over half an hour, my eyes became tired and dry. That no longer happens.

| Beng Hong Lim

I use MK20 every day. My eyes do not feel dry after using it.

| Hui Juan

It has helped my dry eye.

| Sook Wei Lee

If you wear contact lenses, I especially recommend spraying MK20. The eyes feel very comfortable and do not feel dry.

Dry Eye

| CH Mok

I have used it for almost six months and the result has exceeded my expectations. My eyes used to feel dry from long hours at a computer, but that no longer happens after spraying MK20.

| Ee Bebe

MK20 helped improve the dry eyes caused by my contact lenses. My eyes used to be so dry that they hurt, and eye drops did not relieve them. After discovering teacher Yang's MK20, my dryness improved a lot. Thank you, MK20.

| Star Neoh

TV, documents and phones are unavoidable in daily life. Looking at them makes my eyes tired, and when they water I know they are tired. They also become dry. Since spraying MK20, I no longer have these problems, and my eyes feel comfortable and my vision clearer.

| Fanny Fanny

MK20 is really good, especially for contact lens wearers. My eyes do not feel dry after spraying, and the lenses are easier to remove. Before MK20, wearing lenses made my eyes red and dry.

Dry Eye

| Zhang Lifang

At my specialist appointment on 11/9, the doctor said my right eye no longer had dry eye, and the left had improved from severe to mild dry eye. In just over two months, it resolved the severe dryness and eye pain I had experienced for six years. I no longer needed to return to the specialist.

| Wong Khin Ling

I bought MK20 immediately when it first appeared on SHL. The first improvement was in my astigmatism; night driving was no longer a problem. My ophthalmologist said the dry eye was gone, so I said goodbye to eye drops. The cataract has not worsened either. Thank you, MK20.

| Ashley Ang

I initially bought it just to try. Dry eye was very distressing: an episode could last two days or seven days, and I could not tolerate even a little light, let alone go out to work. Cen Cen kept promoting it, so I decided to try. Now I might forget anything else, but I must never forget to bring MK20!

Dry Eye

Sharon Song

MK20 is my favourite. I first used it because my job keeps me at a computer, and I also wear contact lenses. My eyes were very dry and tired, but after spraying MK20 they really stopped feeling dry.

Once my eyelid became red and swollen for no clear reason. I kept spraying MK20. After a day, the swelling slowly reduced; by the third day, the swelling and pain were completely gone. Now I keep MK20 in my room, on my office desk and in my bag, and always take it when travelling. I cannot do without it.

Wendy Kok

Contact lenses made my eyes very dry. I had bought a whole carton of eye drops and kept it in the storeroom. Then I received a small free bottle of MK20 and tried it, including as an eye compress. Strangely, my eyes felt moisturised and no longer dry! I thought perhaps they simply had not been dry that day, so I repeated the compress and spray the next day.

After three days I watched what happened, and now, almost a month later, the daily dryness is gone even if I keep looking at my phone. I have bought the large package many times. I also bought it for my parents, even though my mother is very particular and I worry about buying things for them. She says she can sometimes look at her phone without reading glasses now. It is good, and it is water. You can buy it for parents or older relatives to care for their ageing eyes. It is affordable too.

Replacing Eye Drops: Personal Account

Wong Chin Choy

Wong Chin Choy, age 44

Klang, Selangor, Malaysia.

Concern

My eyes were very dry, sensitive, red and swollen. For several years I had needed eye drops once every three days. My eyes felt very tight, and I constantly worried that they would become too dry, so I always carried eye drops.

Reported improvement

After spraying MK20 for one week, my eyes began to feel brighter and I could see more clearly. Now I no longer need eye drops.

Replacing Eye Drops: Personal Accounts

| Siew Hoon Loo

Because of long-term computer use, my prescription and astigmatism kept worsening. I was also sensitive to sunlight when going out. Since using MK20, my prescription and astigmatism have stopped increasing. I recommended it to my elder sister, who has floaters, and she also improved. MK20 is really great.

| Jessica Cheung

Since using MK20, I have not used other eye drops.

| Caroline Choong

I bought MK20 because of dry eyes. I had used eye drops for ten years and was thinking of changing them when I happened to see Klik Asia selling MK20. I bought a small package. For me, it really works better than eye drops. I produce more tears, my eyes do not get drier with continued use, and my astigmatism has not worsened.

Replacing Eye Drops: Personal Accounts

KF Low

My husband used to use Japanese eye drops. Now he uses MK20.

Connie Tay

My boss had a small growth inside the left eye that was very uncomfortable. After two visits to a specialist, the eye drops still had not helped. The doctor said surgery would be needed if it did not improve. After finishing one bottle of MK20, seeing was no longer uncomfortable. MK20 is a very good product.

Beng Hong Lim

MK20 is really useful. Since using it, I do not need eye drops.

Albert Loong

My eyes were sensitive and kept watering because they were dry. I kept using eye drops, but they became even more sensitive, painful and itchy. The doctor said the problem was the continuous use of eye drops. I then switched to spraying MK20. Gradually, the tearing stopped, along with sensitivity, redness and pain. My eyes feel very comfortable after spraying. I am truly grateful and really like it.

Eye Bags and Dark Circles

| Source explanation

Eye bags and dark circles often result from ageing, heredity, lifestyle, and vascular or pigment-related factors. Eye bags are mainly caused by displacement of fat around the eyes, loose skin or fluid retention. Dark circles can result from dilated blood vessels (blue or purple), melanin deposition (brown) or shadows from eye bags. Common triggers include repeatedly staying up late, a high-salt diet, excessive eye use, sun exposure and allergies.

| Chat accompanying the photographs

"That is startling!"

"Look at the change in this photo."

[Positive reactions]

"How many boxes have you used?"

"Two boxes."

"I bought more today."

"In the two photos, the growth inside the eye looks much thinner."

"With a larger amount, it would basically have gone away."

Eye Bags and Dark Circles

Liew Ling Li

This is effective. My eye bags have reduced a lot.

Ai Ling Lee

Spraying MK20 keeps my eyes very moist. The skin around them feels smooth and fine. Very comfortable.

Siew Hoon Loo

After using MK20, my dark circles improved and faded. My eyes are also less tired when I work at a computer. I have just ordered some for my family because my elder sister has eye problems and cannot drive. I hope it can help her.

Pauline Soon

I use all three MK treasures and have already used two bottles. I take them everywhere. MK20 has helped my dry eyes, and MK13 has improved my eye bags. MK10 is my favourite.

Miao Xuan

After using this, my eye bags disappeared.

Wendy Lee

Since I was young, I always had dark circles like a panda. After using MK20 for one month, I noticed they had reduced a lot. My eyes look bright and feel good.

Eye Injuries

Injury after a fall

Concern: An eye injury caused by a fall.

Reported improvement: After two weeks of spraying MK20 Eye Care Water, the redness and swelling in the injured area of the eyeball gradually subsided.

Huang Lianxiang

When I first discovered this platform, I had already injured my eye in an accident. My vision was blurry and I sometimes saw purple and bluish-green colours. Chairman Yang introduced MK20 and I bought it. I have now used it for two years. My vision is no longer blurry, I no longer see those purple and bluish-green colours, and I do not need glasses to look at my phone. MK20 is first-rate.

Jasmine Lee

MK20 is very effective for burst tiny blood vessels in the eyes.

Recovery from Eye Injuries

| Lye Lee Chien

Hot oil splashed into my wife's eye while she was cooking. I immediately sprayed MK20 for her, and the eye pain eased straight away. MK20 is worth having and buying.

| Sau Mui Yap

My husband's eyes were affected while welding. They were red and swollen and kept watering. I told him to keep spraying MK20, and they improved the next day.

| CF Ng

My friend is a welder. The welding light often made his eyes sensitive and watery, with flashes of light. It was especially uncomfortable when trying to sleep at night. Since I introduced MK20, this problem has finally been resolved. He no longer needs to see a doctor or buy eye ointment.

Milia Around the Eyes

| Leanne Cheung

Teacher, I used MK20! I had small milia around my eyes, and even the beautician did not dare extract them during a facial. After using MK20 for a while, they disappeared. I am very happy!

| Chau May

After MK20, the milia disappeared and the skin around my eyes became smoother.

| Prudence Chen

I want to share that the stubborn milia near the corners of my eyes, which had been there for years, finally disappeared after nine to ten months of MK20. Thank you for the MK product!

Unexplained Tearing

Yong Yoke Yin

Yong Yoke Yin, age 56

Bukit Kemuning, Shah Alam, Selangor, Malaysia.

Concern

Before using MK20, my eyes became very tired and seeing took a lot of effort. My job involves picking impurities and fine feathers out of edible bird's nests, which puts a heavy strain on my eyes. After working for a long time, they could not cope, and I would tear up every day for no apparent reason.

Reported improvement

After using MK20, I can now pick the fine feathers out of bird's nests and thread a fine needle without any problem.

Watery Eyes

| Sammi Woo

Before MK20, my eyes kept watering. After just a few days of use, they stopped watering!

| Siaw Wui Ng

My eyes were very tired and improved a lot after spraying. My daughter has had myopia since birth and her eyes often water. After a few sprays, the tearing reduced greatly.

| Aida Chia

My eyes often watered. Using this for a month and a half has helped.

Clearer Vision

Chan Adery

My husband often uses his phone at night. Recently he said his vision was blurry and his eyes were tired. I gave him MK20 to spray ten times a day. After about a week, he said his eyes were less tired and his vision less blurry. Now he takes my MK20 to use every day and has also started using MK13.

Hui Fen Yang

I am late! My eyes used to tire quickly when looking at a computer. I have used MK20 ever since it was first recommended. Amazingly, my eyes no longer get tired. I spray whenever I remember.

Mc Kong

MK20 makes my eyes feel brighter, but sometimes spraying it makes them itch instead.

Lye Lee Chien

I used to sense blue light in my eyes when trying to sleep and could not sleep well. Since spraying MK20, that sensation has gone and I can sleep properly.

Daisy Jin

MK20 is very useful for long-distance drivers. After spraying, my eyes feel comfortable, my vision is clear and I feel alert.

Experiences with Animals

| Joel Gin

My dog's eyes were inflamed and then developed pus. I sprayed them for about three or four days, and they became much better.

| Linda Low

Cat, last week my eyes were red, itchy and swollen. I quickly took MK20 Eye Care Water and sprayed very diligently, more than 20 times. My eyes clearly improved by 95% and were no longer uncomfortable. Thank you, MK20, for saving my eyes. Excellent!

| Polly Nell

My cat had a bacterial eye infection from a young age. Even with eye drops until she was almost two, it never healed; they only kept her from going blind. I tried spraying MK20. After just three uses, her eyes stopped producing bloody tears. With continued use, her eyes became brighter and were no longer red or swollen. She has now recovered. I only spray occasionally and wipe her eyes for maintenance. The effect has been amazing!

The original page also includes Linda Low's personal account about her own eyes, reproduced here in its original position.
