

MK8

Cellular Nutrition Technology Kidney Care Spray

Quantum technology.
Changing the future.

CELL ENERGIZER | 60 ML

User testimonials

Users share their experiences

Winnie Chan

"I have been taking diabetes medication for 15 years, and I was worried that my liver and kidneys might not be able to cope. After spraying MK8, my urine noticeably had no smell and very little foam. I have just had a health check, and my kidney results were fine, with no problems at all."

Maggie Leung

"Earlier, I suddenly had lower-back pain on the right side, so I sprayed it twice. I actually use MK8 every day, but from that day I increased it to three times a day. By the third day, the pain was already gone."

Connie Chao

"Now that you mention it, my lower back often ached badly after I had been sitting for a long time. Lately, I have been spraying more MK8, and it really hurts less when I stand up. I can get up whenever I want."

Wai Man Pun

"Because I take supplements, I was worried about putting a burden on my kidneys. I spray MK8 every time after going to the toilet. After a few days, my urine was noticeably clear and light golden, with no foam and no urine smell."

Sweating and urinary tract health

AgnesLow AngeGardien

“The change I noticed with MK8 is that I now start sweating after five minutes of exercise, compared with 15 minutes before. Give your body a chance to function better.”

Wong Siew Siew

“I use MK8 and started in March last year. Before using it, I had urinary tract infections and needed to see a doctor about every two months. Things have improved a lot over the past year. I still had infections at first, but I have had none in the past six months. Thank you.”

Kidney readings and daily comfort

Queenie Lau

“The kidney care spray is excellent. My mum was on a lot of antibiotics, and she relied on the kidney care spray to keep her kidney function readings normal. Thank you. My dog also uses MK Pet water, and its coat and eyes are very healthy.”

Erita Chan

“After my mum used MK8, the doctor said her kidney readings looked very good.”

Bebu Go

“I have sprayed MK8 over both kidney areas for two months. I urinate less frequently and sleep right through the night until morning.”

Helen Fong

“I have also used MK8. After spraying it on my lower back, the back pain was gone, and it no longer felt so tight.”

Back discomfort and everyday vitality

Tay Moi Rong

“My husband used to have foamy urine, with bubbles that would not disappear, as well as lower-back aches and back pain. The doctor almost arranged dialysis for him, which frightened him. After spraying MK8 for a while, he is now full of energy and does not need dialysis.”

Christina Lim

“I have used MK8 for a while, and my lower-back aches and back pain have improved. I only use it three times a day, so I will continue using MK8.”

Tony's shared experience

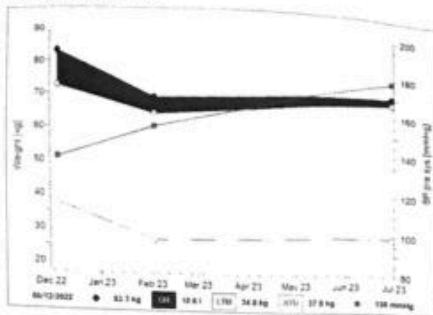

Tony

“What wonderful news! I thought this was impossible!

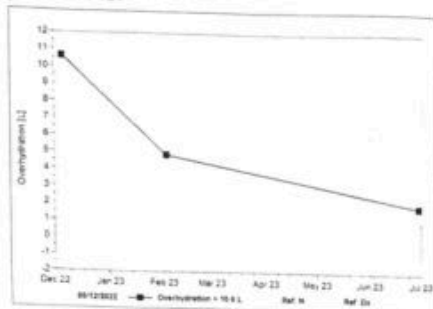

I originally had dialysis three times a week. With my doctor's agreement, it has been changed to twice a week.”

Source caption: "The body-fluid report shows a decrease from 10 L to 2.9 L in recent months, approximately 70%."

Translation note: The caption prints "10.L"; the report shows OH (overhydration) of 10.6 L. OH is not total body water.

A software engineer’s experience

USER NO. MY0012019080101

“I am a computer software engineer. I have always worked in a high-pressure environment, often with my days and nights reversed. Before using the kidney care spray, my kidney function reading had dropped to 2. I could not urinate or sweat normally, and my skin was constantly dry and flaking.

After using MK8 kidney care spray for two weeks, I felt my coordination and strength gradually returning, and I was able to go out and play basketball with my children. When spraying it, I felt intermittent aching in the kidney area, but this gradually eased over time.

My current goal is for my kidney function reading to keep improving, and I hope I will no longer need dialysis in the future.”

A homemaker’s experience

USER NO. MY0032019082202

“I am a homemaker, and I have not started dialysis. Although my doctor reviewed my health-check report and said I needed dialysis, I could not accept this. Then I came across MK8 kidney care spray.

Before using MK8, my kidney function reading was 10. I could not urinate or sweat normally, and my feet were so swollen that I could not walk.

After using MK8 kidney care spray for three months and carefully restricting my diet, my kidney function reading actually rose from 10 to 17. My doctor still has not been able to explain this to me.

My children now hope that I can make a full recovery within two years.”

A businessman’s experience

USER NO. MY0012019053001

“I am a businessman, and my work mainly involves travelling between India and Malaysia for trade. When I was diagnosed with stage 4 kidney disease, my doctor told me to prepare myself mentally for dialysis. My condition then steadily worsened: urinating became difficult, and my responses became slower.

I am grateful that I came across MK8 kidney care spray. When I first started spraying it, I felt some pain in the kidney area and a sensation like an electric shock through my body. After two months, I felt my strength gradually returning, and I even tried flying for a business trip.

My current goal is for my kidney function reading to keep improving, and I hope I will not need dialysis in the future.”

A kidney transplant recipient’s experience

USER NO. MY0012019111502

“I have had a kidney transplant. Unfortunately, nine years later, my body began rejecting the transplanted kidney. After that, I depended on dialysis and was unable to work.

Before using MK8 kidney care spray, my kidney function reading had dropped to 10. I could not urinate or sweat normally, and I constantly had dark spots from toxin deposits on my body.

After using the kidney care spray for one week, I began to feel aching in the right kidney area and wanted to rest all the time.”

A 73-year-old user’s experience

USER NO. MY0022019102201

“I am 73 years old. By chance, my traditional Chinese medicine practitioner introduced me to this kidney care spray. My kidney function reading was 4. My doctor told me I needed dialysis, but I insisted on refusing it. I had little strength in my arms and legs and felt low in energy.

During the first two weeks of spraying it, I did not expect my body’s healing response to happen so quickly. Throughout those two weeks, I felt very tired and wanted to sleep and rest. The most amazing thing was that I could walk without a walking stick, and my legs gradually became stronger.

My energy slowly improved, and the dark spots on my body became much lighter.”
